So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for..".Oh, Micky B, you get it, all right.
