The Chironian answered in a slow, low-pitched, expressionless drawl without turning his head. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. What are those alarms? Lesley, do you hear me?". she asked, "So why're you there? And why isn't your operation bigger?". "Everybody does." "I didn't mean that," Driscoll protested, feeling embar-. It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them.. "No sense paying big bucks for cheeseburgers when your dog will like something else better," Donella. might be the man himself now," Hanlon's voice said from the grille by the screen. "Ah, yes., a little the worse for wear, but he'll be as good as new." He gave a final heave on the lines and pulled another figure up into the picture. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose.. He was lithe and athletic in build, had a thin but rugged face, and was dressed in clothes that were dark, serviceable rather than fancy, and close fitting without being restrictively tight. He reminded Colman of the bad guy in an ancient Western movie. address a stunned meeting of the Mayflower II's Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion..A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved..her second piece..Bernard's jaw dropped. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it.
