And they're so uninhibited' Celia just gaped at her. Veronica winked and nodded. "Really. How do you know when you've had enough to eat?" Donella appears to be arguing with Mr. Hooper, probably trying to get him to shut his trap, but poor. "Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaders if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice." One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask. Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-haired boy of around the same age.. Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie. "They've got heads on their shoulders, they've got confidence in their own thinking, and they trust their own judgments. That's good." "Wining, dining, and conspiring--no doubt until the early hours." As a postgraduate biology student at the University of Michigan, her home state, she had once had ambitions to specialize in biochemistry and the genetics of primitive life-forms. She had hoped that such studies would bring her closer to comprehending how inanimate matter had organized itself to a complexity capable of manifesting life, and she rationalized it outwardly by telling herself that her knowledge would contribute to feeding the exploding population of the new America. And then she had met Bernard, whose youthful zeal and visions of the. As a youth he had daydreamed about becoming an entertainer--a singer, or a comic, maybe--but he couldn't sing and he couldn't tell jokes, and somehow after his parents died within two years of each other halfway through the voyage, he had ended up in the Army. So now, though he still couldn't sing a note or tell a joke right, he knew just how to use an M32 to demolish a small building from two thousand yards, could operate a battlefield compact blindfolded, and was an expert at deactivating optically triggered anti-intruder personnel mines.. At a table stacked with clean plates, Curtis stops and, though still crouching, dares to raise his head. He. The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed." "You see--he's practicing being married already," Bernard said to Pernak with a laugh. Pernak grinned momentarily. Bernard looked at his son. "Well, it's early yet. Figured out what you're doing this afternoon?" Providing for Laura was the reason that he worked, the reason that he lived in

"Read about him. You'll see." Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all? "Good enough?" Sirocco asked, cocking an eyebrow at Lechat.. With a cause, a crusade, a challenge, and a purpose-an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars.. peach juice from a handful of dried pits would be easier than squeezing one drop of pity from this hunter's. "And one called Walters, a lot longer in space than the few trips you've made." "I suppose so." Jean was seeing things differently now, especially after Pernak described the opportunities at the university for her to take up biochemistry again--something that Bernard had long ago thought he had heard the last of. He turned his head to look into the room at where she was sitting on the Sofa below the wail screen, introducing Marie to the mysteries of protein transcription-diagrams courtesy of Jeeves-and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. "Not one of those teenage Casanovas they've got running around. The line stays right there." Perplexed by this odd question, Leilani looked to Micky for clarification..
