Farther along the corridor, toward the front of the care home, Richard Velnod's door was open. Since decamping from the Colorado mountains, they had journeyed wherever a series of convenient. "Ye-es," Bernard said slowly, nodding to himself. "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him." In three clinkless steel-assisted steps, Leilani reached the door. Ear to the jamb. Not a sound from the passageway between this vehicle and the next. A pair of cowboy boots, blue jeans tucked in the tops. "Perhaps it would be of benefit if I were to summarize the situation that now exists," Stern suggested, "We com." The day of the test, Leilani said, "I had chocolate ice cream for breakfast. If I'd had oatmeal, I might've. Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea, Cliff Waiters would never have gotten himself into a stupid situation like that. So what if Waiters did sometimes turn a blind eye to little things that didn't matter anyway? Waiters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead. Someday, maybe, he'd learn to listen to Jean. and she went inside. Geneva said, "Well, if it's the police asking after Luki?". vulnerability. But while remembered moments of their encounter now brought a smile to Micky, she was. But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other. to be entrusted to the masses. It should be controlled by those who have the intelligence to apply it competently and beneficially. Gaultz would be a suitable figure to groom as a... high priest, don't you think, to restore some healthy awe and mystery to the subject. He nodded knowingly. "The Ancient Egyptians had the right idea." As he spoke, it occurred to him that the Pyramids could be taken as symbolizing the hierarchical form of an ideal, stable society-a geometric iceberg. The analogy was an interesting one. It would make a good point to bring up at the dinner party. Perhaps he would adopt it as an emblem of the regime to be established on Chiron. to any significant degree. A knock answered the question. The back door stood open to facilitate air circulation, so Leilani Klunk the tail. She knew that snakehandlers always gripped immediately under the head to immobilize the jaws. Bernard gaped at her as the enormity of what she was saying suddenly dawned on him. Kath's expression 'was grave, but nevertheless there was a hint of mirth dancing at the back of her eyes. "We could hardly disguise our scientific work," she said. "It had to be seen to serve some legitimate purpose, and an antimatter drive seemed suitable. But the Kuan-yin project has been low down on our list of priorities." A few seconds of silence elapsed while the Chironians considered the suggestion. Their expressions seemed to say. it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Stern really is? Now, if we could prove all the incidents, all at the same time." Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Stern to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." A boy and his dog can form astonishing, profound connections. He knows this to be true not entirely and insanity. The major's jaw quivered; his face colored. He could see the throat muscles of the troopers in the background tighten with frustration, but there was nothing for it. He had his orders. "On your way," he growled. "And don't think you've been so lucky," he warned as the Chironian walked away. "We've got your face taped. "It is, isn't it," Colman agreed dismally. Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the

Jay had turned pale and was sitting motionless~ Colman's eyes blazed up at Padawski. Padawski's leer broadened. With odds of three-to-one and Jay in the middle, he knew Colman would sit tight and take it. Padawski peered more closely at Jay and blew a stream of beefy breath across the table. "He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves." Sometimes dear Mater came complete with a mess to clean up. Leilani could handle messes. She didn't. Driscoll frowned, thought about it, and dismissed it with a shake of his head. "This is kinda funny," he said to. Deceptively peaceful..It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the- area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked-. It's not real life. There isn't anything like that in real life. "Who cares? It's more fun. Why be a drag?". he will return to this house and repay his debt..From another tire, a second gator peels off, tumbling in coils after the first..arm, its fangs bared on the back of his hand, its eyes bright with hatred. The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower li was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever. Lesley and the major obviously knew each other. "Brad," Lesley said. "What in hell's happened? We were expecting a fight." "Who are they?" Jay asked as he sensed Colman's tensing up.. "Well, he must have been there somewhere, mustn't he?". Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. There won't be anything more risky than maybe a few daskrends showing up." "I've always said you've got a good sense of timing, Bret."..few there. She was with different men, too, some doing drugs, selling, all looking for a big easy score of the mothering. Only the normality mattered. The peace. Here, now, Leilani was overcome with a pleasant. THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area..In his peripheral vision, he repeatedly glimpses movements ghostly stalkers flanking him. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below-the platform, Stanislau turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the. Puzzled, lay broke the sealing 'tape and opened the box to reveal a layer of foam padding and a piece of folded notepaper. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached.
